

We're Hiring: DevOps Engineer – CI/CD & Cloud Infrastructure

Company: *Kanishka Software Private Limited*

About us:

Kanishka Software Private Limited is a technology solutions firm established by a team of professionals with an extensive experience in Business process consulting and software development.

Position: DevOps Engineer - CI/CD & Cloud Infrastructure

Location: Ghatkopar East, Mumbai

Years of experience - 1+ Years

Type: Full-Time, On-Site

We are seeking a motivated and hands-on DevOps Engineer with 1–2 years of industry experience to support and enhance our cloud infrastructure, CI/CD pipelines, and deployment automation. The ideal candidate will have strong experience with AWS, containerization, and modern DevOps practices, along with solid troubleshooting skills in production environments.

Key Responsibilities

CI/CD & Automation

- Design, implement, and maintain CI/CD pipelines for multiple projects
- Automate build, test, and deployment workflows to ensure reliable and fast releases
- Troubleshoot and resolve CI/CD pipeline failures and deployment issues

Cloud Infrastructure & Deployment

- Provision, deploy, and manage AWS services including EC2, S3, RDS/DB instances, and Auto Scaling Groups
- Implement environment-based infrastructure provisioning to ensure consistency across dev, UAT, and production
- Support scalable, highly available, and fault-tolerant cloud architectures

Containerization & Orchestration

- Build, manage, and optimize Docker containers
- Deploy and manage containerized applications using Kubernetes

- Support microservices-based architectures

Cloud-Native & Serverless

- Work with cloud-native services and serverless platforms
- Assist in designing and maintaining event-driven and serverless workloads

Operations & Support

- Monitor and troubleshoot production, UAT, and infrastructure-related issues
- Collaborate with development teams to resolve application and environment issues
- Ensure system reliability, performance, and uptime

Required Skills & Qualifications

Experience & Technical Skills

- 1–2 years of hands-on industry experience as a DevOps Engineer
- Strong hands-on experience with **AWS cloud infrastructure**
- Experience with **Docker** and **Kubernetes**
- Solid understanding of **microservices architecture**
- Good knowledge of **Linux system administration**

Programming & Databases

- Proficiency in **Python** and/or **Node.js** for automation and scripting
- Working knowledge of **SQL and NoSQL databases**
